PAGE.
Absolute System of Electrical Measurements. By Josiah P. Cooke, Jr., 138, 199, 267, 344, 411
Abstract of a Research in Electro-Magnetism. By Prof. A. M. Mayer, Ph. D., 403
Adding Machine 8
Alizarine,—Identity of Artificial with Natural 204
—Anthracene and 82
Allen Engine. By J. H. Cooper 113
By Charles T. Porter 248, 321, 385
American Colleges and the American Public. By Prof. Noah Porter, D.D. 213
Ammonium Amalgam and Hydrogenium. By Prof. Chas. A. Seely. 10
Amorphous Silica as a Means of Fixing Pigments and Dyes 158
Analysis of some hitherto Undetermined American Minerals. By Prof. A. R. Leeds 62
Anthracene and Alizarene 82
Preparation of. By Dr. J. Gessert 158
Aniline Dyeing,—Poisoning by 302
Artificial Ivory. By Prof. Chas. A. Seely 299
Artificial Ice,—Production of 38
Horizon. By J. H. Lane 222
Populin 297
As regards Protoplasm, in relation to Prof. Huxley's Essay on the Physical Basis of Life. By Hutchinson Stirling, F. R. C. S.; L. L. D 216
Automatic Mercurial Pump. By Prof. C. A. Young, Ph.D 226
A Word to Engineers 364

Baird, G. W., (U, S. N.)—Distilling Apparatus for Steamships 96
Band Re-Sawing Machines 3
Beale's Improved Grease Injector 6
Belting Facts and Figures, (Continued from Vol. LIX.) By J. H. Cooper, ... 33, 109, 161, 252, 317, 377
Bibliographical Notices.—The Life and Letters of Faraday 141
The American Colleges and the American Public 213, 286
Steiger's Literarisher Monatsbericht 215
As regards Protoplasm, in Relation to Dr. Huxley's Essay on the Physical Basis of Life 216
Chemical History of the six days of Creation 216
Laboratory Teaching; or, Progressive Exercises in Practical Chemistry 359
A Cyclopædia of Quantitative Chemical Analysis. 360

Bibliographical Notices.—Die Spectralanalyse in ihrer Anwendung auf die Stoffe der Erde und die Natur der Himmelskörper 66
The Andes and the Amazon 68
Bloxam, (Prof.)——Laboratory Teaching; or, Progressive Exercises in Practical Chemistry 353
Browning's Spectroscopes 149
Briggs, (Robert, C. E.,)—Remarks on the Progress in Iron Manufacture and in Wood-Working Machinery in England 73
British Australian Telegraph 57
Bridge,—The Kansas and Missouri 291
The East River 219
Lime Lights in Caisson of 217
The St. Louis 221
Lime Lights in Caisson of 32
Broadway Underground Railway 367

Calculating Machine,—Reffelt's 146
Carbonic Acid,—The quantity of,—contained in school-rooms 155
Captain,—The 290
Carré Ice Machine,—Comparative Refrigerative Effects of 156
Cause of the Precipitation of Muddy Matter 301
Cause of Fires of Pine Forests. F. Schrader 222
Cause of the Phenomenon of Phosphorescence 372
Chemical Examination of American Grapes and Wines. By Prof. Chas. M. Wetherill 229
Chemical History of the six days of Creation. By John Phin 216
Chromic Acid 228
Childs, (O. W., C. E.)—Survey of the Nicaragua Route for a Ship Canal, 39, 98, 167, 238, 325, 393
Chemical Nomenclature,—The New. By Dr. Adolph Ott 53, 129, 210, 282
Research,—Laboratory for. By Prof. A. R. Leeds 302
Theories. By B. Howard Rand, M. D 85
Tables, according to the Theories of Modern Chemistry. (Concluded from Vol. LIX.) By Prof. A. R. Leeds, 49, 205, 273, 348, 415
Chromium Oxychloride,—A New. By T. E. Thorpe, Ph.D. 124
Clemens, (Melville,)—Novel Mechanical Movement 291
Comparative Refrigerative Effects of the Carré Ice Machine 156
Comparative Economy of Iron and Steel Rails. By Ashbel Welch, C. E 22
Compressibility of Gases 81
Continuity of Gaseous and Liquid States of Matter 293
Continuous Water-Bath 12
Cooke, (Prof. J. P., Jr.,)—Absolute System of Electrical Measurements, 138, 199, 267, 344, 411
Cooley, (Prof. Le Roy,)—On a Steady Air-Blast for Laboratory Purposes, 224
Cooper, (J. H.,)—Belting Facts and Figures 33, 109, 161, 252, 317, 377
The Allen Engine 113
Corona Seen in Total Eclipses of the Sun. By Prof. W. A. Norton 296
Correction. By James B. Francis, C. E 88
Crystallography,—Notes on. By W. H. Wahl, Ph.D 44, 263
Curious Effects Produced by Lightning 384

Cyclopædia of Quantitative Chemical Analysis. By Frank H. Storer, A.M. 360
Dartmouth College Induction Coil 7
Decrease of Rain in France 132
Diamond Rock Boring Machines 76
Distilling Apparatus for Steamships. By G. W. Baird, 2d Asst. Engineer, U. S. N 96
Disburdened Valves 361
Driving Drums and Pulleys,—Kelsey's Patent 5

East River Bridge 219
Edible Earth 155
Editorial Correspondence—
On the Occurrence of Cobalt and Nickel in Gaston County, N. C. By Henry Wurtz. 14
Chemical Theories. By Professor B. Howard Rand, M. D. 84
A Correction. By James B. Francis, C. E 88
Performances of Engines. By W. H. G. West, U. S. N 159
Spectroscopic and Photographic Observations of Solar Phenomena. By Prof C. A. Young, Ph.D 232
A Laboratory for Chemical Research. By Prof. A. R. Leeds 302
Economy,—Comparative, of Iron and Steel Rails. By Ashbel Welch, C. E 22
Electrical Measurements,—Absolute System of. By Josiah P. Cooke, Jr., ... 138, 199, 267, 344, 411
Emmerling, A.—Gaseous and Liquid Phosgene 187
Engineering of the Period. By Wm. M. Henderson, Hyd. Eng 382
Experiments upon the Swain Wheel, No. 3. By Hiram F. Mills, C. E. 182
Exposition,—Industrial, at Cincinnati 81

Fixing of Lead Pencil, Charcoal and Chalk Drawings 300
Filter Pump,—Steam 81
F. Zöllner, on the Temperature and Physical Condition of the Sun 351, 396
Francis, James B.—A Correction 88
Franklin Institute,—Proceedings of Stated Monthly Meetings. May 18th, 70; June 15th, 143. September, 21st, 429. October 19th, 432. Optical Section,—Proceedings of Stated Monthly Meeting. June 1st, 1870, ... 71
Franklin Institute,—Journal of the 297, 376

Gases,—Compressibility of 81
Gas Purifiers,—Reproduction of Oxide of Iron employed in 65
Gain in Weight by Combustion 116
Galena,—Transparency of 116
Gaseous and Liquid Phosgene. By A. Emmerling and B. Lengyel 187
Glass,—Silvering of 88
Gould, Dr. B. A.—The Sun. A Course of Five Lectures, 133, 189, 255, 340, 419
Goodwin's Gear 145
Grease Injector,—Beale's Improved 6
Grape Sugar,—A New Volumetric Method for the Estimation of 154
Grapes,—Chemical Examination of American. By Prof. Chas. M. Wetherill, 229
Gun Cotton Exploded by Camphor Vapor. Artificial Ivory 299

Holtz Machine,—Simplification in the Construction and Use of. By J. C. Poggendorff. Translated by Prof. Leeds 58, 117
Henderson, Wm. M., Hyd. Eng.—Engineering of the Period 382
Hell Gate Obstructions,—Removal of the 366
Heat Developed by Sound 151
Hydrogenium Amalgam of Loew 224
Ammonium Amalgam and. By Prof. Chas. A. Seely 10

Ice,—Artificial Production of 38
Identity of Artificial with Natural Alizarine 204
Illustrations of Momentum 79
Illustration of Pulleys 80
Important Synthetical Reaction. By Dr. F. Royer 209
Induction Coil of Unusual Size 7
Industrial Exhibition 81
Iron and Steel Rails,—Comparative Economy of. By Ashbel Welch, C. E. ... 22
Iron by Electrolysis. By Dr. Klein 300

Jupiter,—Observations on 82
Journal of the Franklin Institute 297, 376

Kansas and Missouri Bridge 291
Kelsey's Wedge Driving Drums and Pulleys 5
Klein, Dr.—Iron by Electrolysis 300

Laboratory Teaching; or, Progressive Exercises in Practical Chemistry, Prof. Bloxam, London 359
Laboratory for Chemical Research. By Prof. A. R. Leeds 302
Leeds, Prof. A. R.,—Chemical Tables according to Theories of Modern Chemistry 47, 205, 273, 348, 415
Analysis of Some hitherto Undetermined Minerals 62
Laboratory for Chemical Research 302
On the Spectra of Certain Metallic Compounds 194
Lightning,—Curious Effects of 384
Physico-Mechanical Effects of. By Prof. Andre Poey 278
Lime Lights in the Caisson of the East River Bridge 32, 217
Liquid State of Matter,—Continuity of Gaseous and 293
Loew, Dr.—Hydrogenium Amalgam 224
Luminosity of the Water Hammer 376

Machine for Addition 8
Mack's Steam Water Heater 77
Mayer, A. M., Ph.D.—Research in Electro Magnetism 403
Observations on Jupiter 82
On the Variation of Magnetic Declination during the Aurora of October 14th, 1870. 424
" Phillip,—Disburdened Valves 361
Mercurial Pump without Valves or Stop-Cocks. By C. H. Smith 292
Millimetre Ruled Paper 7
Mills, Hiram F.—Experiments upon the Swain Wheel 182
Momentum,—Illustrations of 79
Motion of Camphor on the Surface of Water 152

Naval Observatory,—U. S. 9
New Cambridge Transit Instrument. By Prof. Winlock 222
Chemical Nomenclature,—The. By Dr. Adolph Ott 53, 129, 210, 282
Chromium Oxychloride. By T. E. Thorpe 124
Determination of the Atomic Weights of the Earthy Metals 153
Paper Reagent 72
New Volumetric Method for the Estimation of Grape Sugar 154
Nicaragua Route for a Ship Canal,—Survey of the. By Col. O. W. Childs, C. E., (continued from Vol. LIX.) 39, 98, 167, 238, 325
Nomenclature,—The New Chemical. By Dr. Adolph Ott 53, 129, 210, 282
Nontronite. By T. E. Thorpe, Ph.D 127
Norton, Prof. W. A.—A Corona seen in Total Eclipses of the Sun 296
Notes on Crystallography. By W. H. Wahl, Ph.D. 44, 263
Novel Mechanical Movement. By Melville Clemens 291

Observations on Jupiter 82
On Centralizing Motive Power. By J. Richards, M. E 185
On the Change in the Radiation of Heat by Roughness of Surfaces 373
On the Temperature and Physical Condition of the Sun. By F. Zöllner. 351, 396
Optical Section. Proceedings of Stated Meeting—June 1st 71
Ott, Dr. Adolph,—The New Chemical Nomenclature 53, 129, 210, 282
Oxy-Calcium Light applied to Photo-Micrography. By Col. J. J. Woodward, U. S. A 302
Oxygen Process.—T. du Motay's 368

Paper Reagent,—A new 72
Pennsylvania Railroad Shops at West Philadelphia. By Jos. M. Wilson, C. E 311
Phosgene,—Gaseous and Liquid 187
Phosphorescence,—The Cause of the Phenomenon of 372
Photographic Record of Solar Changes. By Prof. Winlock 223
Physical Condition of the Sun—On the Temperature and. By F. Zöllner. 351, 396
Physico-Mechanical Effects of Lightning. By Prof. Andre Poey 278
Picric Acid and Ozone 301
Poey, Prof. Andre,—Physico-Mechanical Effects of Lightning 278
Poggendorff, J. C.—On a Simplification in the Construction and Use of the Holtz Machine 58, 117
Poisoning by Aniline Dyeing 302
Populin,—Artificial 297
Powder of Chlorate of Potassa 272
Preparation of Anthracene. By Dr. J. Gessert 158
Printers' Copying Ink 82
Proceedings,—Franklin Institute 70, 143, 424, 429, 432
Optical Section 71
Puddling Furnaces,—Rotary 368
Pulleys,—Illustration of 80
Pump,—Steam Filter 81
Shaw's Compound Propeller 289
Mercurial,—Without Valves or Stop-Cocks 292
An Automatic Mercurial 226

Quantity of Carbonic Acid Contained in the Air of School Rooms. By Dr. Breiting 156

Rain of Solid Matter 11
Radiation of Heat, On the Change in the,—by roughness of Surface, By Prof. Magnus 373
Rand, Prof. B. Howard,—Chemical Theories 84
Reagent,—A new Paper 72
Reliable Finder for the Spectro telescope 295
Reffelt's Calculating Machine 146
Remarks on the Progress in Wood-Working Machinery, and the Manufacture of Iron in England. By Robert Briggs, C. E 73
Removal of the Hell Gate Obstructions 366
Re-Sawing Machine,—Band 3
Reproduction of Oxide of Iron employed in Gas Purifiers 65
Richards, J. E., M. E.—Wood-Working Machinery,... 17, 89, 174, 233, 305, 388
